Our Extra Virgin Olive Oil took the first place among 76 other olive oils that took part at the biggest Bio-Product **BIOFACH** exhibition in Nuremberg of Germany.

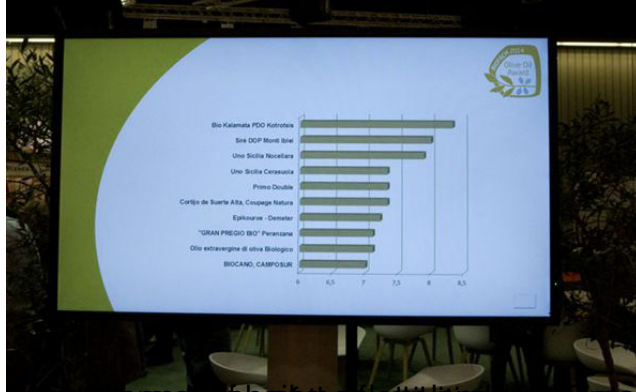

Bio Kalamata PDO olive oil was placed 1st in the 25 years old category in 2013. This year (2014) it got 1st place from 12 till

with the 1st Olive oil from Germany in the 5 years old category in 2014, and the 1st Extra Virgin Olive Oil.

the market and the agonized Greek people with our

The Panhellenic Bio-cyclic organic farm network was really proud of Italian and 8th Kalamata Organic Greek Olive Oil that took the first place in the competition.

Stavros and 8th Kalamata at their facilities in Kalamata, Greece.

At the last among 76 others organic olive oils was certified by Naturland the extra virgin Organic olive oil of Stavros and 8th Kalamata from Kalamata, Greece, a region west of Kalamata. The BioFach exhibition took place on 14-15.2014 in Nuremberg, Germany. All submitted organic oils were assessed by nine taste and smell judges.

Stavros and 8th Kalamata are members of the Panhellenic Bio-cyclic organic farm network. The bio cyclic quality of the olive grows, the olive press and the filling are controlled by the EU organic control through DOP (DOP 404-405), in accordance with the Italian cooperative authority bio-control. All the necessary measures are taken in the olive grove in order to maintain the biodiversity. The growing of different tree species is necessary for reserve the village, also the under and between the trees growing wild and medicinal herbs are being kept for a while because they are responsible for the aroma of the olive oil. There are some examples about the method of collection, which is quite delicate on the restoration of the soil life and self-healing process of the natural system. Bio - Cyclic olive oil that is produced, always in filled (single filling operation) only in "large farm system".

we should also add to the authenticity of the biocyclic and Organic olive oil Bio Kalamata, the fact that the entire production process remains in great hands, only in the producer's hands. The gentle pressing, in which the mash is well in the olive oil, results in a more rapid and easy to digest in temperatures above 20 °C, guarantees the full receipt of all the ingredients and the original taste and aroma, which is useful for the taste and the oil shelf life. Another component of the Bio-cyclic cultivation method is the fact that the leaves, twigs, branches, twigs and produced during the oil pressing, are processed into compost, which is returned after an appropriate maturation to the olive grove.

The distribution of biocyclic olive oil is achieved via the network headquarters of the Organic Marketing & Export Network (OMEN) Bio-cyclic (OMEN Network Services Ltd, which is a member of the Naturland Association. For more information: www.biocyclicnetwork.com

Kalamata return home (21/2/2014) the publication at the local newspaper «Eleftheria

Στην παγκόσμια έκθεση βιολογικών προϊόντων BIO - Fach Φεβρουαρίου 2014 στη Νυρεμβέργη Γερμανίας που διεξάγεται εδώ και 25 χρόνια συμμετείχαμε για δεύτερη φορά φέτος με το λαδάκι μας, το **Biokalamata.kotrotsis**.

Οι κόποι μας ανταμείφθηκαν
παίρνοντας την πρωτιά
ανάμεσα στα 76 ελαιόλαδα που συμμετείχαν
στο πάνελ γευσιγνωσίας.

Από το 1998 είμαστε ενταγμένοι στην Βιοκαλλιέργεια και με πολύ κόπο υποστηρίζουμε το προϊόν γιατί το αγαπάμε και το πιστεύουμε. Τώρα πήραμε κουράγιο να συνεχίσουμε το έργο μας με περισσότερο πάθος. Στόχος μας είναι ούτως ή άλλως η εξαγωγή τυποποιημένου ελαιολάδου.

Εκτός από ελαιοπαραγωγοί, διατηρούμε Ελαιολατρείο (οικογενειακή επιχείρηση) και εδώ και 2 χρόνια Τυποποιτήριο. Έτσι ακολουθούμε και ελέγχουμε όλη την διαδικασία μέχρι το τελικό στάδιο.
